

## **Survival Tip of the month ...**

### **“How to find NORTH using the moon”**

**An easy way to find NORTH by using the moon is to connect the 2 points on any phase of the moon except full moon, and then to draw an imaginary line down to the horizon with the connecting points. At the point where the imaginary line touches the horizon is NORTH.**

**To learn how to navigate accurately in the wilderness book your place on the next NAVIGATION course on 18 January 2020 ...**
