The last paragraph from the end of that "The Tables . . ." posting should read:

"Table 7 is based on ten times the number of minutes of arc in four degrees, that

is, 2400. Entered with 31.'8 it gives log (2400/318), which is 0.8778."

The "four" is the change. Sorry. Did my best, but there could be other mistakes as well.

Bruce
