Triangle in fig 176a inserted onto fig 123. Shape and scale not correct in this sketch!

$$\alpha = 180^\circ - 110^\circ 5' + 31^\circ 21' = 101^\circ 16'$$

$$DA = 30.10 \csc(180^\circ - \alpha) \sin(180^\circ - 110^\circ 5') = 28.825$$

Then according to para 292.

As ρ is negative some of the distances and angles also will become negative.

Finally, $BD = 4,609$

from above $\frac{15.968}{20.58} = AB$ in fig 176a

$$AOB = 0.30182 \text{ rad} \quad \text{making } AB \text{ in fig 123}$$

$$\text{or } B \text{ to P.C. in fig 176a} = 30.18 \text{ (curved line)}$$
